

## How to Install and configure

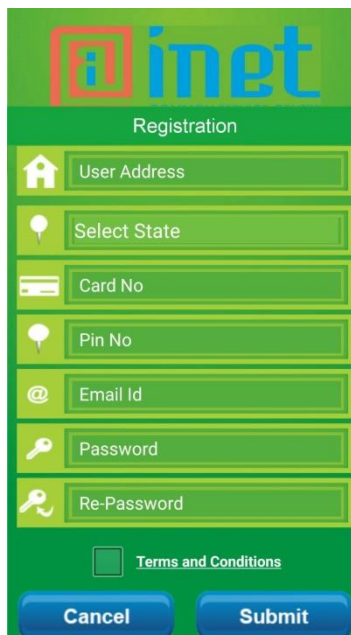

### Step 1: Download

Download IMsecure application from below link.

### Step 2: Application Registration

Follow the instruction on the screen. Insert user details. Click “Submit” button.

A screenshot of the 'inet' application registration screen. The screen has a green header with the 'inet' logo. Below the header, the word 'Registration' is centered. The form consists of several input fields, each with a corresponding icon on the left: a house icon for 'User Address', a location pin icon for 'Select State', a card icon for 'Card No', a speech bubble icon for 'Pin No', an '@' symbol for 'Email Id', a key icon for 'Password', and another key icon for 'Re-Password'. Below these fields is a checkbox labeled 'Terms and Conditions'. At the bottom of the form are two blue buttons: 'Cancel' and 'Submit'.

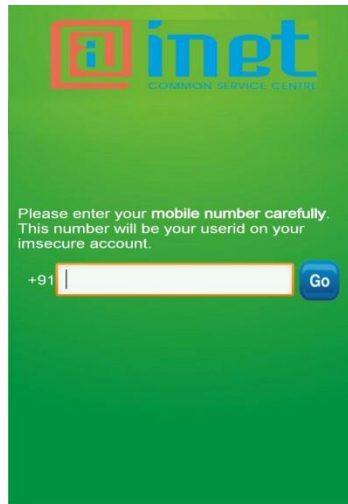

Note: All fields are mandatory.

You can get the Card no and Pin no from your IMsecure booklet.

### Step 3: Mobile Number Validation

Please insert mobile current sim number.

If you are having dual sim handset then Please insert first sim number only.

The screen has a green background. At the top is the '@inet' logo with the tagline 'COMMON SERVICE - COMMON' below it. The main text reads: 'Please enter your mobile number carefully. This number will be your userid on your insecure account.' Below this is a text input field with a cursor and a 'Go' button to its right.

### Step 4 Add recipients:

After Successful Registration please select at least one recipient. This recipient will receive a Sim change alert sms in case of mobile lost.

You can also send an SOS alert in case if you are in panic mode

The screen has a green background. At the top is the '@inet' logo. Below it is the title 'SELECT YOUR RECIPIENTS'. A note reads: 'Note: Select contact from your contact list. Selected recipients will receive SMS if your sim card is changed'. Below the note is a blue button labeled 'Select Contacts Now'. Underneath is the label 'Recipients:' followed by a large empty rectangular box. At the bottom is a blue button labeled 'Done'.

**Step 5 Enable GPS:**

Enable the GPS Service to receive a Mobile Current location incase Mobile lost or it is also use to send your location when you are in panic situations. To get the accurate location GPS is require.

**Step 6 Uninstall Protection:**

Enable the Uninstall protection function to secure your application from unauthorized un-installation.

After complete Registration process, IMscreen Menu screen appears
